

ANNUAL/WELL-WOMAN AND PROBLEM GYN VISIT NOTICE

Thank you for choosing Gwinnett's Progressive Healthcare for Women as your care provider. Our goal is to provide the best possible and most convenient care while properly billing your insurance company for our services provided to you. With the many changes in health insurance coverage, it is important for you to know what will be covered by your health plan and what will be your financial responsibility for services provided.

Some insurers will not pay us to provide 'preventative', 'routine' 'annual' or 'wellness' services at the SAME TIME we address a new and/or chronic medical condition. This means that we may not be able to combine your "annual/well-woman visit" with a "problem GYN visit" in the same appointment. To help us determine how best you would like us to manage your healthcare needs today, please review the following options and check the most appropriate selection below:

I am a new patient here for a... I am an established patient here for a...

Preventative/Annual Well Woman Visit:

Insurance companies only pay one per year. This includes a Physical Examination, Contraceptive Care, Menopausal Hormones, Routine Sexually Transmitted Disease (STD) Screen and Pap Smear. This preventative service is generally covered 100% with no copay or deductible. *If you have had one at another office within the past 365 days, today's visit may not be covered, and you will be responsible for the visit in full. Please check with your insurance company.*

New or recurring problem that I would like to review with my doctor:

A few examples of problem visits include vaginal discharge, pelvic pain, painful intercourse, breast lump, skin irritation/lesion, abnormal bleeding, and STD screen outside of Routine STD screen associated with Annual Well Woman Visit. ***These services are not preventative and are subject to copays, deductibles and coinsurances which are due at the time of your visit.***

Preventative/Annual Well Woman Visit AND a new or recurring problem:

Certain insurance companies will not pay for a problem visit with a Well Woman exam or will only reimburse 50% of our contracted rate for the problem visit. We strive to make healthcare convenient and time efficient for our patients, so we will accept 50% reimbursement of our contracted rate from those payers. However, if your insurance company pays \$0.00 for the problem visit, you will need to schedule a separate visit to address your problem.

If your insurance will reimburse the problem visit along with the Well Woman Visit, the problem visit portion is ***subject to copays, deductibles, and coinsurances which are due today.***

If my insurance does not cover the services for my visit, I agree to accept financial responsibility for services provided.
